

Abhishek Patidar

(+91) 7879418884 ♦ meabhishepatidar@gmail.com ♦ LinkedIn ♦ Github

SKILLS

- Languages & Frameworks:** C#, .NET Core, .NET MVC, RESTful APIs, GraphQL, Node.js, Express.js, JavaScript (ES6+), WebSockets, C++, React.js, Angular (working knowledge).
- Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, DynamoDB, API Gateway), Docker, Kubernetes(basic deployment), GitHub Actions, CI/CD Pipelines.
- Databases & Caching:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Amazon Aurora.
- Tools & Security:** Git, GitHub, GitLab, Bitbucket, Postman, Swagger/OpenAPI, JWT Authentication, OAuth2, RBAC, API Rate Limiting, Performance Optimization, Indexing, Caching.

WORK EXPERIENCE

- AJMS Global** September 2024 – Present
Software Developer Dubai/Remote
- Engineered **scalable, client-server architecture** for a **customer screening platform** using **ASP.NET Core**, supporting high-volume **API traffic** across multiple financial institutions.
 - Designed **RESTful APIs** with robust **rate limiting** and **idempotency** to ensure **reliability, consistency**, and protection from abuse in **production environments**.
 - Implemented **distributed caching** and **database indexing** strategies using **Redis** and **SQL Server** to reduce API **latency** and improve overall **system performance** by **40%**.
 - Integrated **load balancers** and **health checks** to distribute traffic efficiently across **microservices**, improving **fault tolerance** and **uptime**.
 - Configured **CDN** and **blob storage** on **AWS** for media and document delivery, reducing content load time and enhancing **user experience**.
- Intern- Jr. Software Developer* March 2024 – August 2024
- Developed and tested **RESTful API endpoints** in **ASP.NET Core** with SQL Server integration, supporting key features for internal applications.
 - Implemented **GraphQL queries and mutations** for optimized data retrieval, improving flexibility in client-server communication.
 - Collaborated in an **Agile team environment** using **Git, Jira, and code reviews**, contributing to debugging, feature enhancements, and Sprint deliverables.
- Enterslice** March 2022 – May 2022
Software Engineering Intern Bengaluru/Remote
- Developed and integrated **secure, scalable APIs** with proper validation, authentication, and error-handling mechanisms.
 - Designed **notification and alerting workflows** leveraging **message queues and background workers**, ensuring reliable and timely delivery.
 - Implemented **asynchronous processing pipelines** using **Redis queues**, increasing throughput and responsiveness under high load.
 - Gained practical exposure to **RESTful API design, database optimization, caching strategies, and Agile development practices**.

EDUCATION

Poornima University 2020-2024
Bachelor of Technology in Computer Science and Engineering

PROJECTS

- AI-Powered Financial Risk Analyzer**
Node.js | Express.js | Python (Flask) | PostgreSQL | Redis | React.js | JWT | Pandas | Chart.js
- AI-driven platform** for evaluating **financial risk profiles**, improving lending and investment decisions through **predictive analytics**.
 - High-performance RESTful APIs** built with **Node.js** and **Flask**, delivering real-time **risk scores** based on **historical data** and **predictive trends**.
 - Optimized system throughput by 40%** using **Redis** for caching and enhancing **cross-service communication**, ensuring fast access to risk reports.
 - Designed a **dynamic React.js UI** for users to **upload financial data**, view **AI-generated risk insights**, and explore interactive **visualizations**.

Additional Experience and Awards

AWS Certified Developer – Associate
